

BRUNO SALAS RODRÍGUEZ

+52 899 118 4491 — Brunich99@gmail.com — github.com/Brunich — Monterrey, Mexico

PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience in systems support, data integrity, and process automation. I build web and mobile applications through to production, analyze data with SQL and Python, and implement authentication and access control for applications. I document processes and translate requirements between technical and non-technical teams.

EDUCATION

Universidad Autónoma de Nuevo León (UANL)

B.S. in Software Engineering — 5th semester

Monterrey, Mexico

2023 – 2028

PROFESSIONAL EXPERIENCE

Software Development & Systems Support Assistant

UANL

Monterrey, Mexico

2023

- Participated in validation testing of system updates; reproduced defects and documented findings for the release team.
- Reviewed logs and monitored structured data flows to ensure integrity and consistency across application interfaces.
- Collaborated with technical teams to document issue-resolution procedures and system behavior.

Tutoring — Programming & Databases

UANL

Monterrey, Mexico

2024

- Supported students by resolving code errors, environment configuration failures, and programming logic questions.
- Advised on C, C#, JavaScript, and SQL queries, with error diagnosis and review of results.
- Produced guides and support material, and delivered small-group demonstrations to reduce repeat questions.

TECHNICAL SERVICES

Custom websites and web applications

Design and implementation

- Clean, responsive interfaces, from mockup to published site with its own domain. *React, Vite, Tailwind, Node.js, Vercel*

Complex data analysis and reporting

Data and KPIs

- Cleaning, validation, and cross-referencing of data from multiple sources; dashboards and KPI reports. *Python (Pandas), R, SQL, Excel*

Login and access control for companies

Internal applications

- Sign-up, per-user roles and permissions, password recovery, and protected routes. *Supabase, REST APIs, tokens*

PROJECTS

Punto U — Web and mobile platform

React 19, Vite, Supabase, Capacitor (Android APK)

punto-u-app.vercel.app

In production

- Connects university students through campus missions; authentication, cloud database, and deployed mobile build.

Explanatory software architecture chatbot

React, TypeScript, API integration

Competition (Hackathon)

Working product

- Answers in Spanish and English and explains each response with diagrams, analogies, and commented code.

IA Rogue — 3D modeling, shaders, and procedural systems

Godot 4, GDScript, 3D art, class architecture

2024 – present

- 3D models, custom shaders, procedural biomes, and class organization of a large project versioned in Git.

ADDITIONAL TRAINING

CS50: Introduction to Computer Science — Harvard University / edX ([view certificate](#))

2022

Data Science: R Basics — Harvard University / edX ([view certificate](#))

2020

Introduction to Corporate Finance — Columbia University / edX ([view certificate](#))

2022

TECHNICAL SKILLS

Web Development: React, Vite, Node.js, Tailwind, HTML/CSS, deployment on Vercel

Data & Integrations: SQL, REST APIs, JSON, Supabase, system interfaces

Data Analysis: Python (Pandas), R, Excel (Advanced), dashboards and KPI reporting

Quality & Support: Data audits, validation testing, UAT support, debugging, process documentation

Automation: Python and Node/TypeScript scripting, automated workflows

Systems & Tools: Windows 10/11, Office 365, Git/GitHub, VPN, RDP

Programming Languages: JavaScript, TypeScript, Python, SQL, C, C#, GDScript, HTML/CSS

Languages: Spanish (native), English (fluent), Portuguese (proficient)
